

MALAK ALSAEED

Software Developer | Full-Stack, Backend & API Development

+973 33859939 | alsaeedmalak8@gmail.com | Manama, Bahrain | [linkedin.com/in/malak-alsaeed](https://www.linkedin.com/in/malak-alsaeed)

PROFESSIONAL SUMMARY

Software Developer with hands-on experience delivering full-stack web applications, mobile solutions, REST APIs, database-driven systems, enterprise platforms, and workflow automation. Strong working knowledge of C#, Python, .NET, ASP.NET Core, Django, Django REST Framework, React, TypeScript, SQL Server, PostgreSQL, PHP, Laravel, and Microsoft Entra ID. Experienced across requirements analysis, development, testing, deployment, maintenance, production support, and system integration.

WORK EXPERIENCE

Software Developer

Gulf Air (via Computer World) | August 2025 - Present | Bahrain

- Develop and maintain full-stack web applications and enterprise systems using C#, .NET, ASP.NET Core, React, and TypeScript.
- Design and integrate REST APIs, backend services, and database-driven solutions using SQL Server and PostgreSQL.
- Implement authentication and authorization using Microsoft Entra ID and support secure system integrations.
- Build internal platforms, administrative systems, reporting solutions, mobile solutions, and workflow automation for operational business functions.
- Contribute across the software development lifecycle, including requirements gathering, development, testing, deployment, maintenance, and production support.
- Collaborate with stakeholders and cross-functional teams to translate business requirements into reliable technical solutions.

Software Development Trainee

Arabian Gulf University (AGU) | 2025 | Bahrain

- Gained exposure to PHP and Laravel in a software development environment.
- Explored approaches for extracting and processing data from PDF documents.
- Applied programming, debugging, and problem-solving skills during the training.

EDUCATION

Bachelor of Information & Communication Technology - Programming

Bahrain Polytechnic | Graduated January 2026 | Bahrain

TECHNICAL SKILLS

Languages: C#, Python, TypeScript, JavaScript, Swift, PHP, SQL

Frameworks: .NET 8/10, ASP.NET Core, .NET MAUI, Django, Django REST Framework, React, Laravel, Livewire

Backend & APIs: REST APIs, Django ORM, Entity Framework Core, Celery, API Integration, Backend Services

Frontend: Blade, Tailwind CSS, Flux UI, XAML

Data & Testing: PostgreSQL, SQL Server, Oracle, SQLite, Redis, Pandas, OpenPyXL, Pytest, pytest-django

Tools & Platforms: Git, GitHub, Docker, Ruff, mypy, Microsoft Entra ID, Microsoft PowerApps, Kiro IDE, Linux

Core Skills: Full-Stack Development, Mobile App Development, System Integration, Workflow Automation, Authentication & Authorization, Testing, Debugging, Production Support, PDF Data Extraction

WORK PROJECTS

Station Data Hub

React, TypeScript, ASP.NET Core, PostgreSQL

Enterprise station-information platform with administrative management, permissions, audit logging, reporting, and station documentation workflows.

GAA Simulator Training System

ASP.NET Core, Razor Pages, SQL Server

Training operations platform supporting simulator bookings, schedules, utilization, reporting, and analytics.

CFMS

.NET, PostgreSQL, React, TypeScript

Crisis information and family-matching system supporting incident workflows, public forms, case review, matching, and reporting.

PERSONAL PROJECTS

GarageFlow - Garage Management SaaS

Python, Django, Django REST Framework, PostgreSQL, React, TypeScript, Celery, Redis, Pandas, Pytest, Docker

Multi-tenant garage management platform for customers, vehicles, appointments, job cards, parts inventory, suppliers, invoices, payments, expenses, and operational reporting.

LANGUAGES

Arabic: Native English: Fluent

WORK PROJECTS - ADDITIONAL

Call Center Chatbot

Chatbot project supporting call-center digital services.

IOC Project

Software project supporting airline operational workflows.

Seat Map

Developed a .NET MAUI tablet application designed for cabin crew to view aircraft seat maps and support onboard passenger and operational workflows.

RIO

Airline software project developed within Gulf Air's digital systems environment.

Genesys APIs

Designed and developed REST APIs for secure data exchange and system integration with Genesys.

CMC Crew Card Generation

Developed a crew card generation solution for CMC operational use.

PERSONAL PROJECTS - ADDITIONAL

FlightOps

Graduation full-stack application for flight operations management.

Globify.bh

Full-stack website built using Laravel Livewire (PHP), Blade, Tailwind CSS, Flux UI, SQLite, and GitHub.

Finance Tracker

Personal finance web application for budgeting, expense tracking, and financial analytics.

ADDITIONAL PROJECTS

Swift University Project

Developed a mobile application using Swift as part of a university software development project.

TRAINING & PROFESSIONAL DEVELOPMENT

PowerApps Platform - Microsoft

Forsati Gulf / ThinkSmart for Development and Training | Supported by Tamkeen

Training focused on developing and deploying custom applications with Microsoft PowerApps to streamline business processes and improve productivity.

Kiro IDE (AWS) - Agentic Coding Session

Completed an agentic coding session focused on AI-assisted software development using Kiro IDE.

AI-Powered Connected Airline Platform Webinar

Comply365 | February 19, 2026

Attended a professional aviation technology webinar covering AI-enabled operational content, safety, risk, quality, compliance, and training management.

VOLUNTEERING

Volunteer - Information & eGovernment Authority (iGA)

[Bahrain National Team for Combating COVID-19 | 2020](#)

Supported national COVID-19 response efforts through iGA community-partnership initiatives, including technical and awareness support activities.
