

# Malak Alsaeed

## SOFTWARE DEVELOPER • FULL-STACK, BACKEND & API DEVELOPMENT

Manama, Bahrain • [+973 33859939](tel:+97333859939) • [alsaeedmalak8@gmail.com](mailto:alsaeedmalak8@gmail.com) • [LinkedIn](#) • [Portfolio](#)

### PROFESSIONAL SUMMARY

Results-driven Software Developer with hands-on experience in full-stack web development, REST API engineering, mobile applications, and enterprise workflow automation. Proficient across modern technology stacks including C#, Go (Golang), Python, .NET Core, Django, React, TypeScript, SQL Server, and PostgreSQL. Demonstrates expertise across the entire Software Development Lifecycle (SDLC)—from requirements engineering to development, security integrations (Microsoft Entra ID), testing, deployment, and production support. Experienced in delivering scalable solutions within high-availability aviation and enterprise environments.

### TECHNICAL SKILLS

|                                 |                                                                                                                                                                              |
|---------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Languages:</b>               | C#, Go (Golang), Python, TypeScript, JavaScript, SQL, PHP, Swift                                                                                                             |
| <b>Frameworks &amp; Web:</b>    | .NET 8/10, ASP.NET Core, React, Django, Django REST Framework, .NET MAUI, Laravel, Livewire, Blazor                                                                          |
| <b>Backend &amp; APIs:</b>      | RESTful APIs, Entity Framework Core, Django ORM, Node.js, Celery, API Architecture & System Integration                                                                      |
| <b>Databases &amp; Storage:</b> | PostgreSQL, Microsoft SQL Server, Oracle, SQLite, Redis                                                                                                                      |
| <b>Tools &amp; Platforms:</b>   | Git, GitHub, Docker, Microsoft Entra ID (Azure AD), PowerApps, Kiro IDE, Linux, Pandas, OpenPyXL                                                                             |
| <b>Core Competencies:</b>       | Full-Stack Development, Mobile App Engineering, Enterprise Integration, Workflow Automation, Authentication & Authorization, Automated Testing (Pytest), PDF Data Extraction |

### WORK EXPERIENCE

**Software Developer** | [Gulf Air \(via Computer World\)](#) — *Muharraq, Bahrain* **Aug 2025 – Sep 2026**

- Architect, develop, and maintain high-performance full-stack web and mobile systems utilizing C#, .NET Core, ASP.NET Core, React, Blazor, and TypeScript.
- Design, secure, and integrate enterprise REST APIs and backend microservices connected to SQL Server, Oracle, and PostgreSQL databases.
- Implement robust enterprise authentication and authorization controls using Microsoft Entra ID (Azure AD) to ensure secure system integrations.
- Engineer operational business portals, administrative hubs, reporting tools, and workflow automation solutions for airline operations.
- Develop specialized cross-platform mobile solutions, including a .NET MAUI tablet application enabling cabin crew to interact with live aircraft seat maps and passenger workflows.
- Drive all software development lifecycle (SDLC) stages, including requirements gathering, cross-functional collaboration, automated testing, deployment, and 24/7 production support.

**Software Development Trainee** | [Arabian Gulf University \(AGU\)](#) — *Manama, Bahrain* **2025**

- Gained hands-on experience building structured backend web components utilizing PHP and the Laravel framework.
- Researched, developed, and evaluated automated algorithms for extracting, parsing, and processing unstructured data from PDF documents.
- Applied core software engineering principles, debugging tools, and relational database queries to support academic systems.

### PROFESSIONAL PROJECTS (GULF AIR)

#### Station Data Hub (*React, TypeScript, ASP.NET Core, PostgreSQL*)

Enterprise station-information platform featuring role-based permissions, audit logging, documentation management, and administrative dashboards.

#### GAA Simulator Training System (*ASP.NET Core, Razor Pages, SQL Server*)

Training operations platform supporting simulator bookings, schedules, utilization tracking, operational reporting, and analytics dashboards for business users.

#### Seat Map Application (*.NET MAUI, XAML, Tablet App*)

Tablet application for cabin crew to view interactive aircraft seat maps, support onboard passenger workflows, and handle multiple aircraft configurations.

**CMC Crew Card Generation** (*Card Generation, Data Processing, Print Workflow*)

Crew certificate generation workflow featuring document generation, ICAO TD1 card preview, card register workflow, and print-ready output.

**RIO (Flight-Delay Follow-Up Hub)** (*Blazor, C#, Oracle*)

Flight-delay follow-up hub for monitoring delayed sectors, assigning delay codes by department, departure information sheets, and OTP dials and delay-code analytics.

**Integrated Operations Centre (IOC) System** (*ASP.NET Core, C#, SQL Server*)

Centralized operational hub supporting real-time flight monitoring, disruption management workflows, and inter-departmental communication for airline operations.

**CFMS (Crisis & Family Matching System)** (*.NET, PostgreSQL, React, TypeScript*)

Crisis information and family-matching system supporting incident workflows, case review, public-facing forms, and reporting insights.

**TravelFairSimReg** (*.NET, React, SQL Server*)

Registration and session-management workflow for travel fair and simulator events, featuring validated registration forms, session slots with capacity limits, and team rosters.

**Call Center Chatbot** (*AI, Workflow, Automation*)

Digitally enabled call-center support solution improving service delivery, workflow automation, customer interaction logic, and operational efficiency.

**Genesys APIs Integration** (*REST API, C#, Integration*)

Secure REST API integrations for data exchange, system connectivity, and business operational workflows with Genesys platforms.

**ACADEMIC & INDEPENDENT PROJECTS**

**FlightOps Executive – Graduation Project** (*ASP.NET Core, Razor Pages, SignalR, EF Core*)

Network operations control centre with a live surveillance tracking map, executive KPIs, disruption intelligence, and route, fleet, and user administration.

**Globify.bh – University Capstone Project** (*Laravel Livewire, PHP, Tailwind CSS, Flux UI, SQLite*)

Full-stack web application developed for university graduation, featuring dynamic UI components, streamlined workflows, and database management.

**GarageFlow – Multi-Tenant Garage SaaS** (*Python, Django REST, PostgreSQL, React, TypeScript, Celery, Redis, Docker*)

Multi-tenant automotive management system featuring vehicle scheduling, job cards, inventory tracking, invoicing, and reporting. Fully unit-tested with Pytest.

**Finance Tracker** (*React, TypeScript, Node.js, PostgreSQL*)

Personal finance management tool for tracking budgets, expense categorization, and financial visualization.

**EDUCATION & SPECIALIZED TRAINING**

**Bachelor of Information & Communication Technology – Major in Programming**

Graduated Jan 2026

**Bahrain Polytechnic** — Manama, Bahrain

**Go Software Engineering Program**

**Reboot 01 Institute** — Peer-to-peer, project-based intensive Go learning

**PROFESSIONAL DEVELOPMENT & COMMUNITY ENGAGEMENT**

**PowerApps Platform Training** – Microsoft / Forsati Gulf (ThinkSmart & Tamkeen)

**AI Engineering & Aviation Technology** – Kiro IDE Agentic Coding Session & Comply365 Seminar (2026)

**Volunteer Technical Support** – Information & eGovernment Authority (iGA) / COVID-19 Response (2020)

**LANGUAGES**

**Arabic:** Native | **English:** Full Professional Proficiency
